Community Mapping  
Research Project

# Introduction

## A little bit about S.A.L.V.E International...

Founded in February 2008, S.A.L.V.E. International (Support and Love Via Education) is a community based organisation that works with children living on the streets of Jinja. Our motivation is to reduce the number of children in the streets by helping them re-enter education and re-unite with their families.

The purpose of the research you have been involved with was to map out the organisations, schools and vocational training centers working in Kyamagwa, Wakitaka, Namulesa and Nakabango.

## How will it be useful to you?

Often when we are working in the community, we are approached by members of that community in need of services that we are unfortunately unable to provide. We are aware that there are many organisations, schools and vocational training centers providing a range of services to meet the needs of the local community and we wanted to come up with a directory of these organisations so that in the future, when we come across someone in need of a service we are unable to provide, we can refer them to an organisation who may be able to offer them the support they need.

We want to create a network of information that will help both S.A.L.V.E, and other organisations and schools achieve a mutual goal of reducing the number of children living on the streets.

Alongside this directory, we will be creating an online map with all of the organisations and schools in this directory, where any new schools or organisations can be added. You can access this map at <http://www.salveinternational.org/learn/community-mapping/>
