I also think making sure that where there are laws in place to ensure that violence against women and girls is not happening they need to be enforced. More needs to be done to ensure that the people who commit violence are taken to court and punished for their crimes. The current conviction rates for violent crimes against women and girls are very low.

I definitely agree with you — ANONYMOUS

ANONYMOUS DEC 15, 2022 11:55AM UTC

I think we need to better understand where the violence is coming from to help us to stop it from repeating itself. So more research into who is doing the violence most often and why would help prevention programmes to be designed.

I agree with , but also I think we need to find out the cause of the violence, for example if its to do with drunkenness then measures have to be put in place to address this. — ANONYMOUS

Do you think drunkenness is a big cause of violence against women? What could we do about it? — ANONYMOUS
